-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 112***

Sole claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the word "especially" (lines 2 and 10) takes the form of 'for example' and renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Also, the phrase "functions which go beyond the basic functionality..." (lines 9-10) is indefinite as 'beyond' encompasses a broad aspect as to what those functions might be.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by USP 6175789 B1 to Beckert et al ("Beckert").

Regarding claim 1, Beckert teaches a computer system (22; fig. 2 at least) comprising at least one processor (64) and at least one memory for controlling/coordinating powertrain control for a motor vehicle (vehicle shown in fig. 10), having a software architecture (title) that has essentially the following elements or components: an operation system and specific services having an operating system and specific services as the basis for all other elements and applications (figs. 2-3 support operating system (131) and specific services provided by items 26, 28, 74 – 82; col. 6, line 53 – col. 7, line 30 at least); a basic functionality for carrying out universal requests (item 70 carries out universal functionality), a layer for coordinating tasks for basic functionalities of the base functionality and for linking in plug-ins, at least one plug-in for carrying out practical tasks (module 62 supports plug-ins for carrying out practical tasks; note col. 6, lines 21 – 52 at least).
